Massage Therapy

Stress reduction, relaxation and rehabilitation - given the demands of today's world, it's easy to see why massage therapy has risen popularity as an outlet for revitalizing the spirit. Along with its rise popularity, the demand for well-trained massage therapists goes beyond mere relaxation. It is often a critical medical treatment for clients who are dealing with serious physical issues and can help decrease feelings of anxiety and depression while increasing general well-being. With a strong fundamental understanding of massage therapy, you can establish a career helping people lead healthier lives. At Milan Institute, we can prepare you for a career helping you master the best of Eastern, Western and ancient practices, as well as the latest techniques. From anatomy to sports massage, you'll have the skills and confidence to excel.

Once you've mastered the concepts of massage therapy, you can begin your career finding natural ways to make people healthy in a number of different professional settings: massage therapy clinics, spas, or be your own boss and set your own hours and schedule.
